

**The College of Liberal Arts and Sciences Announces  
The Cynthia W. Colangelo Award for Breast Cancer Awareness  
for Undergraduate and Graduate Students**

The College of Liberal Arts and Sciences at the University of Florida announces the following Cynthia W. Colangelo Award for Breast Cancer Awareness. The purpose of the award is to support students in the College of Liberal Arts and Sciences who are actively involved in the fight against breast cancer through community service and activities. Award amounts will vary from \$250–\$1000 per recipient, depending on the number of selected recipients. Recipient(s) will be selected each Spring semester on the basis of an essay detailing their breast cancer awareness activities and thoughts (500 words or less), to be submitted to the scholarship committee in the CLAS Dean’s Office **by February 23** of each year.

The Colangelo Award was established by the late Cynthia Louise Welsh Colangelo, who passed away at the age of 55 on August 27, 2013 after a long and courageous battle with metastatic breast cancer. Cindy was born and raised in Miami, Florida, and was a proud graduate of the University of Florida with a major in Sociology. A resident of Carrollton, Texas, with her husband and two sons, Cindy was well-known for her far-reaching community service efforts. After working in the corporate world for many years, Cindy returned full-time to her passion for helping other people. She served on the boards and as director of a number of local non-profit organizations. Through her efforts as a speaker with the [Susan G. Komen for the Cure](#) Speakers Bureau, Cindy became an accomplished speaker whose presentations always left her audiences deeply moved. Despite her small stature, Cindy was larger than life. She had a huge heart, and that is why she chose to create this award for students in UF’s College of Liberal Arts and Sciences. Though Cindy eventually lost her battle to breast cancer, she wanted her efforts to continue through recognition of students who continue the struggle against this deadly disease.
